

Cut Resistant Undergarment

The use of cut-resistant undergarment pants is mandatory for all events/disciplines at category race level 0 and 1 from season 2025/2026 (July 1st 2025) onwards. The mandatory implementation requires a minimum protection level of 3 stars according to the FIS DITF test standard everywhere between the iliac crest and the onset of the ski boot.

Incorrect FIS Label on Dynastar Skis

We were informed by Groupe Rossignol that 284 pairs of skis (118 pairs of SL Women's and 166 pairs of GS Women's) were distributed with an incorrect FIS label.

The skis are correctly marked as "GS 188", but the label currently reads "SL WC Men." (*see picture below*).

The same situation applies to the "SL 157" skis for women.

The company is correcting this issue by covering the incorrect label with a sticker showing the correct denomination.

These skis have already been distributed across the USA and Canada.

Missing FIS Label on Stöckli Skis

Stöckli has identified an issue with the labelling on its GS Racing skis. For the 2025/26 season, the company introduced a new design and has now realized that the marking indicating the shoulder width of the ski is missing. As shown in the image, this marking was present on the previous design (left), but for the same geometry it is absent on the new design (right).

This issue affects all GS skis in lengths 188, 190, 191, 193, 195 and 197 produced in 2025. Stöckli estimates that approximately 120 pairs are impacted. The skis concerned are those used by their World Cup and EC/FIS athletes (14 men and 7 women). Through this statement, Stöckli guarantees the full conformity of its GS skis with the *FIS Specifications for Alpine Racing Competition Equipment 2018*. The shoulder width of all Stöckli GS skis longer than 184 cm is narrower than the required maximum of 103 mm as stated in the FIS regulations.

Stöckli will correct the labelling for all future GS Racing ski productions. However, the company confirms that it will continue to use the skis with incomplete labelling during the 2025/26 season. These skis will be equipped with an additional FIS labelling sticker to ensure clarity and compliance.
