RE: Fall Meeting - U14 Updates

2025 – 2026 ACC Motion #9: U14 Quota Proposal

Link to passed Motion

Updated Verbiage: U14 Camp Registration and Club Quota Process

1. **Camp Capacity:** The host ROC will determine the maximum number of athletes the camp can accommodate based on available resources and staffing.
2. **Club Quota Allocation:** The PNW Office will calculate each club's quota based on the total number of U14 licenses across PNW as of January 1 of the applicable season. The quota percentage will be calculated by dividing the total camp capacity by the total number of U14 licenses across PNW. Each club's quota will then be calculated by applying this percentage to the club's U14 license count and rounding to the nearest whole athlete.
3. **Quota:** The division will send out the quota details to each club. Each club then submits their quota list to the host ROC by the specified date.
4. **Unused Quota Slots:** If any club does not fill its allocated quota, the remaining available slots will be reallocated amongst the clubs.

Alpine Competition Committee Motion Form

For consideration by: PNW ACC

Reference: Posting of Results at U14 and younger events

Original Version:

New Proposal:

At all PNW U14 and younger USSS sanctioned events (including sanctioned YSL races), the organizer will publish digital results at the conclusion of each timed run immediately following each run's completion. Additionally, handwritten times SHOULD be displayed on a scoresheet at or near the finish area during the duration of each contested race run.

Comments:

The intent is to provide consistency from race to race with how and when results are published at the U14 and younger levels. 25 / 26 was the first year that live timing / live results were not permitted at youth events since the inception of live timing. It worked great in a lot of ways, and I think the overall spirit of the intent was achieved. However, ROC's have been left to interpret how and when to post results creating a lot of confusion among athletes, coaches, and parents too.

The events with a scoreboard at the finish seemed to create a gathering spot for the competitors and coaches. And the ability to post live results at the conclusion of each event was nice for those unable to attend in person and for those on the hill that are unable to move during the duration of the event.

Pacific Northwest Ski Association

Alpine Competition Committee

Date: 10/24/2026

For consideration by: ACC

Reference: Ski Up Agreement

Original Version:

The Ski Up Agreement comes from US Ski and Snowboard. The form does not designate how often during a season a ski up form may be used or if used more than once during the season if the athlete then becomes a member of the new age group. PNW Division does not have a policy for approving Ski Up Agreements.

New Proposal:

PNW Division has a policy that suggests athletes ski in their assigned age group races. We require the Alpine Competition Committee and Nordic Competition Committee to review and make decisions on any Ski-up request.
